

OLIMPO®

*Naturally delicious,
the way nature intended!*

OLIMPO, producing oils of quality and confidence since 1954.

OLIMPO belongs to a group of small companies, all related to the products and sub-products of the olive.

In our farms and mills (own and of our partners) in Jaen and Albacete our star products are produced: EXTRA VIRGIN OLIVE OIL AND OLIVES.

Moreover, we specialize in working with the olive: extraction of pomace oil, drying of pomace and exploitation of biomass for heating as our commitment to the environment protection.

OLIMPO is a company that is dedicated to the bottling of olive oil, among other oils. It counts on modern facilities, where olive oil is received, tasted, classified, analysed and bottled according to the market needs.

We count on a team of professionals who follow the whole process of product traceability from the farm to the consumer. Several generations have already dedicated to the olive grove, from farmers, technicians, small producers, and commercials.

It is our passion and our mission that ensure the quality and reliability of our product.

Our long tradition and business experience in olive sector represent our quality parameters and know-how. During production process, quality comes first.

Our olive oils are obtained from different Spanish regions, mainly from our region, Castilla La Mancha. We carefully select the best extra virgin olive oils to produce the best quality and taste.

OLIMPO commercializes these qualities of olive oil:

- ORGANIC and CONVENTIONAL EXTRA VIRGIN OIL,
- VIRGIN AND PURE OLIVE OIL,
- POMACE OLIVE OIL.
